SOFTWARE ARCHITECT

Software Architect • Cloud Architect • Solutions Architect • Engineering Leader
System Design & Architecture • Cloud Infrastructure • AI-Driven Development
Co-Founder • GCP Professional Cloud Architect • AWS Solutions Architect
Cloud-Native Solutions • Building High-Performing Teams • Solving Complex Problems

WORK EXPERIENCE

Independent Software Architect

Nov 2023 - Present

- Developed Alpha Flow, a technical analysis platform that generates daily trade signals for U.S. equities using proprietary trading strategies
- Designed and developed Peer Coaching Network, a platform that helps professional coaches connect with peers for practice coaching and professional development
- Leveraged AI-assisted software development tools and workflows to accelerate application design, implementation, testing, and product delivery
- Earned the ICF ACC credential, completed PCC training, and delivered 250+ coaching hours helping technology leaders strengthen leadership, decision-making, and career growth.

Sibros Technologies, San Jose, CA

Feb 2020 - Nov 2023

Senior Software Engineer / Senior Solutions Architect

- Led the architecture and implementation of ODX, a cloud-native distributed diagnostics platform enabling remote diagnostics for millions of connected vehicles while reducing diagnostic downtime
- Designed and implemented cloud infrastructure using Infrastructure as Code (IaC), enabling scalable and secure deployment of cloud-native applications across AWS and GCP
- Developed core libraries and cloud-native microservices within a distributed systems architecture, creating isolated enterprise environments for large customers
- Established and led a Solutions Architecture team focused on customer engagement and solution prototyping, contributing to a significant increase in closed deals
- Built and mentored a global team of backend, cloud infrastructure, and platform engineers, improving platform security, scalability, and incident response effectiveness

Helix RE, Inc., San Mateo, CA

Oct 2017 - Feb 2020

Co-Founder / Director of Engineering

- Co-founded Helix RE, scaling the platform to achieve \$1.5M in revenue within three years

- Architected and implemented cloud infrastructure using IaC, enabling seamless scalability and reducing operational costs
- Designed a Kubernetes-based distributed processing platform, enabling parallel processing of 75 GB workloads and multi-billion-point cloud datasets
- Developed geometry generation pipelines using Autodesk Forge API and Revit Plugins, reducing 3D model creation time from 8 weeks to 5 days
- Designed streamable PDAL pipelines and an automated deviation detector for 3D models, reducing QA effort by 20% and shortening BIM model review cycles

Past Experiences

Nov 2004 - Oct 2017

- Containerized Hadoop and Spark components using Docker, deploying them on GKE and optimizing resource utilization of in-house servers (**Ericsson, US**)
- Designed, developed, and deployed Spring Boot-based REST APIs as microservices on AWS, automating infrastructure provisioning using Ansible and CloudFormation to reduce deployment time and improve system scalability (**TESCO, UK**)
- Optimized the insurance enrollment pipeline, achieving an 8x speed improvement, and led the migration of 350+ applications to IBM WAS, ensuring zero downtime (**Legal & General, UK**)
- Developed a custom REST framework for the first AMEX iPhone app, delivering 12 APIs and contributing to its 4.9-star rating (**American Express, IN**)

EDUCATION

ENGINEERING DEGREE

Bachelors in Computer Science, Madras University, India

CLOUD CERTIFICATIONS

AWS Certified Solutions Architect - Associate

Google Cloud Certified - Professional Cloud Architect

TECHNOLOGIES

Programming: Go, Python, Java, SQL

Cloud: AWS, GCP, Terraform, Kubernetes, Docker

Architecture: Distributed Systems, Microservices, REST APIs, Cloud-Native, IaC

Domains: Automotive, Connected Vehicle Solutions, Architecture Engineering & Construction (AEC), Retail, Insurance, Financial Services, IT Consulting, Enterprise Solutions

Engineering Practices: Design Principles, Clean Code, Test-Driven Development (TDD), Observability, Performance Optimization
